## Electrical/Electronic Assembler

### Description

If you are self starting, energetic, mechanically and electrically inclined, then we want to talk to you about this great position!

This is an excellent opportunity to put your skills to work making money and being involved in the best production team on the planet!

### Responsibilities

The right person will have some experience in working with their hands to build and assemble various mechanical and electrical devices and assemblies.

Here are some things you'll need to do...

- Use hand tools
- Read basic assembly drawings
- Use power tools like drills, screwdrivers, and punches
- Follow instructions
- Soldering Experience
- Stay busy and pull your weight

Duties include assembling electrical components in a production environment along with daily set up and cleaning of your work area, and keeping clean and organized.

### Qualifications

The right candidate will have experience in a light manufacturing environment, will have a willingness to learn and progress.

Training will be provided to the right person, but some basic experience will be required.

The right candidate will need to have a proven history of being at work on time, working well with others, have valid drivers license and reliable transportation. An employment screening will be conducted.
