Part-Time Production Assembler

Description

Are you looking to work a few hours a week to make some extra money?

Let's get you out of the house for awhile working in our clean climate controlled facility in Dugger, we'll supply the tools and work-station. Oh, did we mention we have free coffee?

We are looking for a few individuals who have retired or left the workforce but have assembly skills that we can use!

This is a part time assembly position that will allow you to work a few hours a week, choose the days, and choose mornings or afternoon. You will be paid for each completed unit that you assemble, and it takes about an hour or two to complete a unit.

So it's a great way to put in a few hours and make some good pocket money at the same time.

If you are restricted on how much money you can make, this will allow you to only work as much as you need.

If you are self starting, energetic, mechanically and electrically inclined, then we want to talk to you about this great position!

This is an excellent opportunity to put your skills to work making money and being involved in the best production team on the planet! And do it on your terms!

Responsibilities

The right person will have some experience in working with their hands to build and assemble various mechanical and electrical devices and assemblies.

Here are some things you'll need to do...

- Use hand tools
- Read basic assembly drawings
- Use power tools like drills, screwdrivers, and punches
- Follow instructions
- Be able to lift up to 20 lbs for short times

Qualifications

The right candidate will have experience in a manufacturing environment, will have a willingness to learn and progress.

Training will be provided to the right person, but some basic experience will be required.

Hiring organization

ITU - LearnLab
