## Painter & Finisher in Manufacturing

### Description

If you are self starting, energetic, responsible and mechanically inclined, then we want to talk to you about this great position!

This is an excellent opportunity to put your skills to work making money and being involved in the best production team on the planet!

### Responsibilities

The right person will have experience in painting, coating and finishing metal products.

Here are some things you'll need to do...

- Inspect and clean manufactured metal products.
- Operate sandblasting equipment.
- Operate Shot blasting equipment
- Paint coat products with oil based spray paint
- Operate powder coating equipment and oven.

Duties include daily set up and cleaning of your work area, and keeping clean and organized.

### Qualifications

The right candidate will have experience painting and coating in a manufacturing environment, will have a willingness to learn and progress.

Some equipment training will be provided to the right person, but some basic painting experience will be required.

The right candidate will need to have a proven history of being at work on time, working well with others, have valid drivers license and reliable transportation. An employment screening will be conducted. A drug test will be administered.
